**Every child is an artist and there no end to education. Learning is a way of life. Its's not that you read a text box,pass an exam and finish with education. The whole of life,from the moment you're born is a process of learning. The more you practice the better you get**

# Principal's desk

"Start by doing what's necessary; then do what's possible;  
and suddenly you are doing the impossible."

This is the mantra of our school to make the impossible possible. My strength is my hard working department and the young brains working to reach the pinnacle. GLT SBM is the perfect passage to reach zenith.

BY BELA MISHRA  
(Principal)

## A message from vice principal

"Only as high as I reach can I grow,  
Only as far as I speak can I go,  
Only as deep as I look can I see,  
Only as much as I dream can I be."

In GLT SBM School, we transform dreams into reality, thoughts into ideas and ideas into action. This is the magic of our school.

Dear Readers,

"Once you learn to read, you will be free forever..."

Literacy is a bridge from misery to hope. The more you read, the more things you will know. The more that you learn, the more places you will go. No matter how busy you may think you are, you must find time for reading, or surrender yourself to self-chosen ignorance.

It gives me immense pleasure in extracting talents, ideas, skills from different fields was a difficult task but we finally made it possible. Our school plays a vital role in the life of young students learning to blend knowledge, wisdom, values and integrity at the very outset of the schooling years in indeed imperative.

I would like to express my deep gratitude to our founder Principal Mrs. Bela Mishra and Vice Principal Mrs. Ritu sood for their constant support and encouragement.

I also thank the Editorial Board for their support and also the students for their whole heartedly contribution amidst the corona crisis and making it a success by giving their contribution virtually.

## Mathematics-

Mathematics takes us into the region of absolute necessity to which not only the actual word, but every possible word must confirm. The true spirit of delight, the exaltation, the sense of being more than man, which is the touch stone of the highest excellence is to be found in mathematics as surely as poetry.

## Students Column

**This is an independent column for students and it plays a very crucial role in the magazine. Students shared their creativity through this page amidst the lockdown where sometimes we lose hope and feel despair and pessimism slowly enveloping us. These young energetic students full of optimism dint break and showed their creative work below.**
